

Cost Structure and Period Rates, for Oil Tankers (Classic Reprint) (Paperback)

Filesize: 1.85 MB

Reviews

Very useful to any or all type of people. This is certainly for those who statte there was not a worth reading through. You can expect to like how the writer write this pdf.

(Dr. Rashawn Lang)

COST STRUCTURE AND PERIOD RATES, FOR OIL TANKERS (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Cost Structure and Period Rates, for Oil Tankers One of the most important determinants of the long-term charter rate in the long run is the short-term rate at the point of the transaction. The reason for this is that the short-term rate incorporates in it certain fundamental structural relationships between supply and demand that are valid over time, and are reflected in the operations of the tankship markets. With the exception of a small percentage of tanker capacity that is used for marginal trades, such as grain, vegetable oils and molasses, the demand for tonnage on spot is the difference between the total demand for independent tonnage and the time-charter demand. The same can be said of the supply side of the market. This circularity is necessarily reflected in the rates. As a result, with the exception of the uncertainty premiums that we will shortly explain, at any point of time, spot and the long-term rates are interdependent. In using the short-term rate in a model for time-charter rates in the long run, we must therefore divorce the former from any short-run fluctuations that do not reflect basic structural relationships which are valid over time. Otherwise, the long-term rate that we will be determining will be a long-term rate in the short run. Consequently the model that we will propose will include only normal short-term rates. The model to be tested from 1970 to 1980 is of the form $R = f(X_1, X_2, X_3, X_4, X_5, X_6, E)$, where R is the long-term rate, R is the short-term rate, X 's are certain risk premiums and E random error, all functions of time. About the...
