It must be installed in accordance with scientific principles and natural laws. Relation to Health The value of plumbing to public health is important because it removes human wastes from the immediate neighborhood of buildings. Plumbing also furnishes the opportunity for the liberal consumption and use of pure wholesome water for drinking, bathing, culinary and other domestic purposes. Water Supply and Service Distribution The distribution of an adequate supply of water sufficient in volume and pressure to flush the various fixtures, is absolutely essential in maintaining a system of plumbing sanitary. Control A water service to a building is usually controlled by a combination of stop and waste cocks or valves. The first is known as a corporation stop which is tapped into the street main. The second, the curb stop, is located...
